

Canadian Immunization Research Network

Initial Project Proposal

Title: <i>(max 2 lines)</i>	
Lead Investigator and Institution:	
Other Investigators and Institutions:	
Objectives: <i>(max 6 lines)</i>	
Specific Aims: <i>(max 6 lines)</i>	
Methodology: <i>(max 14 lines)</i>	
Study Duration:	
Budget Estimate:	
Relevant Research Area and/or Objectives Met (check all that apply):	
	<input type="checkbox"/> Rapid evaluation for safety & immunogenicity (all ages)
	<input type="checkbox"/> Population based methods for vaccine effectiveness & safety (including AEFI)
	<input type="checkbox"/> Interventions that improve vaccine acceptance & uptake
	<input type="checkbox"/> Vaccine modeling & economic analysis
Stakeholder priority area:	
Other (specify):	
Does the proposed project address any of the following (check all that apply):	
	<input type="checkbox"/> Sex and gender considerations in methodologies
	<input type="checkbox"/> Research on Indigenous populations
	<input type="checkbox"/> Official Languages Minority Communities (where appropriate)
	<input type="checkbox"/> Ethical, legal, and social implications such as recruitment of subjects from vulnerable populations
	<input type="checkbox"/> Importance of leveraging a wide range of existing immunization clinical trials
